

### **Fish Habitat**

No fish habitat assessment was done for the Lake Whatcom Landscape Plan. Information regarding fish habitat for the Lake Whatcom watershed can be found in the Fish Habitat section of the Lake Whatcom Watershed Analysis, which was completed in 1997.

The information in Map I-1: Fish Habitat – Current and Historic, was provided by Washington Department of Fish and Wildlife as an update to the information contained in the watershed analysis report and covers the entire planning area, within and outside the watershed boundary.
